STRIPS**

Cut anywhere LED COB strips

Custom made to the millimeter! Cut to any distance you want. Thanks to the copper edge around the LED, soldering can be done anywhere. This CRI90 COB strip is available in several colours such as 2700K, 3000K, 4000K & 6000K. The strip in the photos is IP20 but IP65 is also possible. This strip is available in 12V & 24V and available on a roll of 5 meters. This strip also saves time due to less soldering work. see a comparison below.

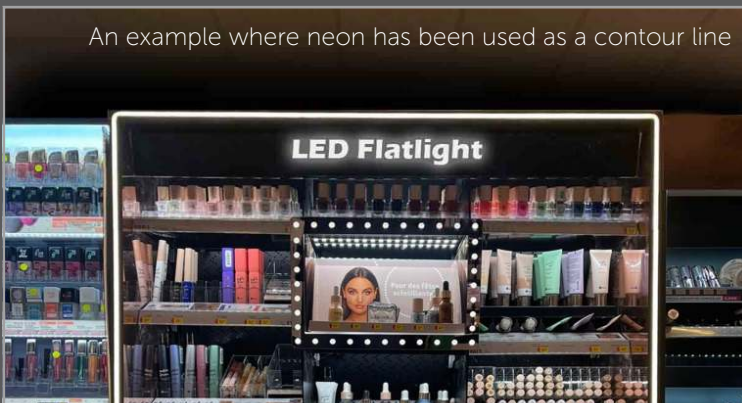

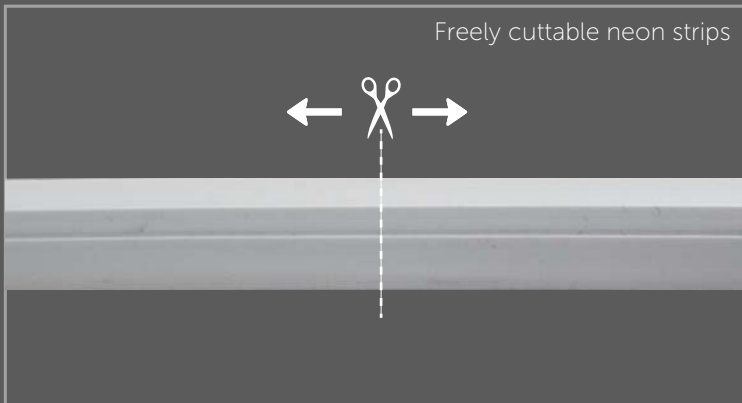

This COB LED strip is available in different colour temperatures, so you can always create the right atmosphere. Do you have any questions sales@led-flatlight.eu or call 073-6895799

CUT
ANYWHERE
NEON

Cut anywhere neon strips

This neon housing contains the freely cuttable COB Strip. This means that this neon variant can also be cut and soldered at any distance you want. This neon strip is available in several colours such as 2700K, 3000K, 4000K & 6000K. This neon strip is available in 12V & 24V and available on a roll of 5 metres. Thanks to the housing, we guarantee an even light line and your customisation will be even easier.

This NEON COB LED strip is available in different colour temperatures, so you can always create the right atmosphere. Do you have any questions sales@led-flatlight.eu or call 073-6895799
